3. Drag and drop search

User can drag and drop text or image to drop box on the right side to search similar text or image. (Note that the drag and drop function is only available on document detail page.) Select a paragraph or an image, then drag and drop to a current box or a new box created automatically if there is already an image in the box.

Find more button will allow user to find similar text or image in particular drop box. And user can also create new box with new topic and delete useless boxes.

4. Tag relevant/irrelevant document

User can tag irrelevant or duplicate documents when browsing detail documents. And he or she can check those documents tagged.

<<back   [   ] highlight   prev   next   duplicate   irrelevant
